2013

Complementing advertising campaigns with promotional products will drastically boost their impact. People like receiving gifts even more than we realise. Studies show that more than 70% of target audiences appreciate receiving a promotional product and use it on a daily basis. Over 60% of recipients favour advertisers who send useful gifts. Ask your promotional products distributor how your company can get closer to your customers. For more information, visit our website **www.nothingbringsyoucloser.com**

eppa
european promotional products association

'Promotional products, nothing brings you closer' is an initiative of EPPA, the European Association of promotional products.

BAMBOO

A sustainable alternative.
Bamboo is the tree with the fastest growth rate on Earth. It provides a very resistant material, able to support heavier loads than metal.

0 CM
0 INCH

NON-WOVEN

Resistant and economic.
Light and malleable. Its durability and reuse quality makes it environmentally friendly.

ECONOMIC

Pay less for a lot more.
A wide range at the best prices. Find the product with the visibility your brand deserves.

QUALITY PRINTING SERVICES

SCREEN PRINTING

Screen printing is a printing technique which provides trustworthy and long lasting results.
A method of printing designs on a surface by means of a thin cloth on which ink is forced through with a rubber pad. This method may be used on smooth surfaces; printing in high definition even with more than one colour. Recommended for large quantities.

Used on: note pads, rulers, pill boxes, among other things.

TEXTILE PRINTING

A method similar to silkscreen printing, however optimized to be used on textile.

Used on: aprons, polar fleece items, non-woven bags, among other things.

TRANSFER

This method consists of transferring a printed design on paper onto another surface by means of heat. Enables even results on various types of fabrics and is very economic for multicolour printing on small quantities.

Used on: aprons, bags, backpacks, non-woven bags, among other things.

LASER

Laser engraving is a precise and long lasting method. The laser beams engrave the design on hard surfaces. Besides metal, it can also be used on wood, leather/PU and glass with exquisite and elegant results.

Used on: metal pens and key rings, wooden containers, card holders, cork products, among other things.

PAD PRINTING

This method consists of indirect transfer of ink by means of a mould which has been engraved in low relief. I tis the most common method used on small objects such as pens. Due to its versatility, it adapts to curvilinear forms and is the most economical solution for various products.

Used on: pens, USB flash drives, footballs, among other things.

DYE-SUBLIMATION

Sublimation transfers a design from paper onto another surface by means of heat. Sublimation has the advantage of being able to be used on concave surfaces, producing well defined designs (ideal for photographic reproduction). It also results in a design highly resistant to extreme temperatures.

Used on: mugs, among other things.

EMBROIDERY

The well-known embroidery technique allows customization on good quality fabrics with great quality and perfection. Embroidery replicates designs with a large variety of colours and distinct lines.

Used on: towels, blankets, caps, conference bags, clothes, among other things.
